MARVIN
ESSENTIAL[®]
COLLECTION

Design and Performance Made Easier

Characterized by clean lines, powerful performance, and streamlined options, the Marvin Essential collection makes it easier to achieve design and quality. The Essential collection features durable Ultrex[®] fiberglass interiors and exteriors, making it virtually maintenance free.

PURE RELIABILITY

DURABLE FINISHES

STREAMLINED SELECTION

DOUBLE HUNG WINDOWS
Ebony

Ultrex Fiberglass Exterior

Ultrex® fiberglass is a high-performance material that significantly outlasts and outperforms vinyl and vinyl/wood composite materials while offering unmatched durability and timeless style. This state-of-the-art material was developed by Marvin and is featured on the interiors and exteriors of the Marvin Essential® collection.

Marvin uses Ultrex fiberglass because the material you choose for your windows matters. Ultrex is strong, stable, has a durable acrylic finish, and is energy efficient.

Strength

The strength of Ultrex fiberglass translates into long-term ease of operation, minimal maintenance, and superior performance.

Stability

By expanding and contracting at nearly the same rate as glass, Marvin windows and doors made with Ultrex fiberglass are more resistant to leaks and seal failures.

Finish

The proprietary acrylic finish is 3x thicker than competitive painted options, and resistant to chipping, chalking, or fading.

Energy Efficiency

Ultrex fiberglass combined with energy-efficient glass options can help manage the amount of light and heat entering and leaving your home.

How It's Made

Ultrex fiberglass is a composite material made of fine glass fibers woven into a cloth then bonded together with a formulated polyester resin. The continuous strands of fiberglass give Ultrex its strength in resisting breakage.

1

Raw Fiberglass Strands

Thin strands of strong glass cables are saturated with specifically compounded resins.

2

Pultruded Fiberglass

The strands are pulled through a heated die and cut with diamond-edged blades to form Ultrex fiberglass.

3

Proprietary Acrylic Finish

A proprietary acrylic finish is then applied; it's smoother and 3x thicker than other brands.

Stability You Can Count On

Constant expansion and contraction can gradually break down windows and doors, causing leaky seals, poor operation, and loss of structural integrity.

Ultrex® fiberglass expands and contracts at virtually the same rate as glass, so Marvin Essential® windows and doors stay tight and true over time, resisting air leaks, seal failures, and stress cracks that can compromise energy efficiency and long-term performance.

This low rate of expansion and contraction also allows windows and doors to open and close on demand without sticking or binding from swelling, warping, material distortion, or deformation from the heat.

A Long-Term Finish

Marvin Ultrex fiberglass finish is verified to the American Architectural Manufacturers Association (AAMA) 624 specification. Achieving AAMA 624 verification means that our finish has passed rigorous tests that simulate the harsh conditions encountered throughout the life of a window or door.

Ultrex fiberglass uses an acrylic finish that is paintable, fade resistant, and virtually maintenance free. With a finish that's 3x thicker than competitive painted options, it resists chipping, denting, and peeling.

ULTREX FIBERGLASS HAS

75%

less expansion than Fibrex®

87%

less expansion than vinyl

IN EXTREME WEATHER CONDITIONS

Ultrex fiberglass
stays true

Vinyl
can expand

Lasting Performance

Proprietary Ultrex fiberglass finish resists scratches, chalking, and fading—even in dark colors

Exteriors can be painted to match any home

Virtually maintenance free—no sanding, scraping, or painting care needed

Finish is 3x thicker than competitive painted options

Design Efficiency Pros in Mind

The low thermal conductivity and superior performance of Ultrex fiberglass combine with a selection of energy-efficient glazing (glass) options that help manage the amount of light and heat entering and leaving your home. Our unique Ultrex® fiberglass material, available factory services, and network of dedicated service and support personnel make the Top Rated Efficiency collection the perfect choice – no matter the project.

Windows and doors with low conductivity reduce heat loss in homes, which translates to lower energy bills.* Ultrex fiberglass provides an insulated barrier against extreme weather temperatures, keeping homes comfortable and reducing heating and cooling costs.

Windows + Doors

The Marvin Essential® collection combines a streamlined selection of durable windows and doors with easy installation, minimal maintenance, and straightforward features. All Essential windows and doors feature Ultrex® fiberglass interiors and exteriors for minimal maintenance.

DOUBLE HUNG WINDOWS
Ebony

Casement

The Marvin Essential® Casement window is a side-hinged option built for smooth operation with a concealed multi-point locking system. Available in large sizes for ample daylight and clean sightlines.

A House Among the Pines

Combining elements of Nordic and Japanese design, Svart Hus was built to blend in with the natural world. Learn more on the Marvin

ALMOND FROST

WHITE

PVD FINISHES

The Physical Vapor Deposition (PVD) process adds a layer of toughness to hardware exposed to environmental factors like direct sun and humidity. PVD finishes resist fading and discoloration, even in coastal areas. PVD has the highest grade corrosion-resistant finish. PVD finish is available on exterior door hardware in Oil Rubbed Bronze, Satin Nickel, and Brass.

Simple and Trim Options Efficient Installation

Ultraex fiberglass exterior trim is offered with all rectangular Marvin Essential® windows and doors bringing together design, durability, performance, and look of Essential collection. Windows and doors can be extended to the trim. Essential products offer a number of installation options and accessories that make it easy to meet project demands.

EXTERIOR TRIM OPTIONS

Since 1912, Marvin has been a family-owned and -led company, with a legacy of innovation and commitment to the highest quality. We understand the unique opportunity windows and doors have to improve our spaces and how we feel in them. That's why we never stop pushing what's possible and inventing new solutions to channel fresh air, enhance light quality, and connect with the world around us.
