Window Terms + Definitions

1

Frame

There are three components to the frame: the header across the top, the jambs down each side, and the sill across the bottom. Marvin® frames are built strong with a variety of high-quality wood species.

2

Lite

Each area of glass is called a lite. Marvin offers divided lite patterns for whatever look you wish to create.

3

Hardware

Marvin uses only the highest-quality locks, handles, lifts, pulls, and hinges in a wide variety of durable finishes.

4

Glazing

The glass in a window is called glazing. Marvin's broad range of glazing options can meet both high-performance and refined aesthetic requirements.

5

Sash

The sash – operating or stationary – is comprised of horizontal rails, vertical stiles, and glazing. Marvin's large solid sash offers a precise fit and ease of operation.

8

MARVIN ULTIMATE COLLECTION

WINDOWS

Window Operating Styles

Double Hung

Double hung windows have two movable sashes that operate vertically.

Awning

An awning is hinged to the frame at the top and opens outward. If hinged on the bottom, it's called a hopper.

Glider

A window with a sash that slides horizontally to open and close.

Casement

A window that is hinged to its frame at the side and opens like a door.

Fixed or Picture

An inoperable window with direct glaze or in-sash configurations. Available in a wide range of polygon and radius shapes.

In-Sash Picture

Fixed window designed to match the profiles of operable windows like double hung, casement, or awning.

Direct Glaze Picture

Fixed window with no sash – the glass is glazed directly into the frame.

MARVIN ULTIMATE COLLECTION

9

Double Hung Windows

Marvin Ultimate™ Double Hung windows combine state-of-the-art design with classic style. Advanced engineering and high-quality construction make our double hung windows incredibly durable, versatile, and easy to use.

A New Chapter for the Hadley House

An impressive interior renovation—including massive 7-foot Ultimate Double Hung G2 windows—helped transform a 19th-century home in Wenham, Massachusetts. Learn more on the Marvin Inspiration blog.

marvin.com/hadley-house

Double Hung G2

Engineered for performance and designed to inspire, each aspect of the Marvin Ultimate™ Double Hung G2 window is made with purpose. Our engineers consider every detail, from the most innovative features to the most minute subtleties, all because the windows in your home help illuminate the most important parts of your life.

INTERIOR FEATURES AND PERFORMANCE

Rich Wood Interior
Offers beauty and warmth with six wood species and 10 interior finish options.

Narrow Checkrail
Provides a sleek aesthetic at 1-15⁄16" to maximize daylight opening while maintaining historical accuracy.

Sash Balance Systems
Enables smooth operation at the largest sizes.

Energy Efficiency
Multiple glass options for meeting standards in energy efficiency for various regions and climates.

Exclusive Autolock
Activates when the sashes are closed, locking the window.

Tilt Wash Mode
Allows easy access to exterior glass for cleaning and maintenance.

EXTERIOR FEATURES AND PERFORMANCE

Expansive Sizes
Larger than 5' wide by 10' high.

Design Versatility
An array of simulated divided lite patterns, interior and exterior color options, 10 hardware finishes, and archtop models.

Superior Weather Performance
LC-PG50 on most sizes. Optional commercial (CW) performance and IZ3 certified coastal performance on most sizes.

Durable Cladding
Extruded aluminum exterior cladding with an AAMA-verified 2605 finish and backed by a 20-year warranty against chalking and fading.

Aluminum Interlock
Eliminates drafts and improves the window's overall structural integrity.

Traditional Sill Bevel
The 14° bevel provides optimal water management while maintaining a classic look.

Double Hung G2

The Marvin Ultimate™ Double Hung G2 window is an embodiment of our dedication to the craft of creating windows and doors. Influenced by the rich, historical significance of this window style and inspired by innovative design, each feature is thoughtfully added and every detail is carefully considered. This is all in service of shaping a window that deserves to be in the unique homes our customers desire.

fig. 1

fig. 3

FEATURES

- Narrow checkrail maximizes views while maintaining historical accuracy
- Unique tilt-wash mode allows convenient cleaning of both sides of the glass from indoors
- Exclusive auto-lock activates when the window is closed
- Available with Commercial Windows Performance certification
- Expansive sizes to fit openings up to 5'6" wide and 10'6" high
- Choose traditional Ogee profiles or square profiles for a more contemporary look

Double Hung Round Top G2

The Marvin Ultimate™ Double Hung Round Top G2 window will add traditional arching and elegant lines to your home or historic preservation project. With the same features and grace of the Ultimate Double Hung G2 window, this window offers design flexibility with numerous variations of radius shapes. Choose from multiple divided lite patterns to further enhance the arch of the window. These versatile windows – available in a wide range of sizes – can provide a subtle accent or a dramatic focal point to enhance your home design.

fig. 2 **DOUBLE HUNG ROUND TOP G2 WINDOWS, VARIATION 6 STYLE**
Ebony

Eyebrow and Half Eyebrow Radius Operating Double Hung
A classic look with a gentle eyebrow radius. Beautiful as a stand-alone window or as part of an assembly.

Half Eyebrow Single Hung
This striking window style adds elegant curves to a two-wide window assembly (not shown). Available on Single Hung only.

Half Circle Radius Operating Double Hung
A dramatic window with a true half circle arch. The look gives a beautifully smooth transition from jamb to header. Both sashes are operable.

Eyebrow Transom and Picture
This stationary window is available as a transom or picture window. These windows are designed to complement the Ultimate Double Hung G2 window with correlating sizes and matching springline.

Half Circle Transom
This simulated half circle transom window can be sized to stand alone or easily fit above a double hung window.

fig. 2

FEATURES

- Choose from a full selection of radius shapes and transom configurations for design flexibility
- Narrow checkrail maximizes views while maintaining historical accuracy
- Unique tilt-wash mode allows convenient cleaning of both sides of the glass from indoors
- Exclusive auto-lock activates when the window is closed
- Expansive sizes to fit openings up to 5' wide by 10' high
- Choose traditional Ogee profiles or square profiles for a more contemporary look

Double Hung Insert G2

Ideal for window replacement, the Marvin Ultimate™ Double Hung Insert G2 window adds quality craftsmanship, beauty, and energy efficiency to your home without compromising architectural integrity. Its frame-in-frame design is built precisely to seamlessly fit into your unique window opening, so there's no need to remove the existing frame or disturb the exterior or interior trim of your house.

- Expansive sizes to fit openings up to 4'6" wide by 8' high
- Additional configurations include round top, stationary transom, or picture window
- Choose traditional Ogee profiles or square profiles for a more contemporary look

Single Hung G2

The Marvin Ultimate™ Single Hung G2 window blends traditional beauty and state-of-the-art performance. With the top sash stationary and the bottom sash operable, a single hung style is often preferred in a cottage-style window with a small top sash that doesn't need to open. The Ultimate Single Hung G2 window offers an auto-lock feature for convenient security, durable hardware for smooth operation, and a unique Wash Mode for easy cleaning. Customize your design with round-top styles or optional Lift Lock, the exclusive bottom rail locking mechanism for easier operation in hard-to-reach areas.

Casement Styles

Full Frame or Narrow Frame

Marvin Ultimate™ Casement and Ultimate Casement Narrow Frame windows are among the most versatile and innovative casement windows ever produced. Ultimate Casement styles feature concealed multi-point locks, a patented Wash Mode, and durable hardware that operates smoothly even at the largest sizes for easier operation in hard-to-reach areas.

ULTIMATE CASEMENT

A recessed sash for a traditional look, plus a full jamb, offer design flexibility for new construction or full frame replacement.

Ultimate Casement Exterior with 4-5/8" Full Jamb
The Ultimate Casement has a recessed sash for a traditional or historic look.

ULTIMATE CASEMENT NARROW FRAME

A flush sash to the exterior and narrow jamb depth make this window an easy choice for frame-in-frame replacement or more contemporary new construction applications.

Ultimate Casement Narrow Frame Exterior with 2-3/8" Narrow Jamb
The Ultimate Casement Narrow Frame has a flush-to-frame sash for a contemporary look.

Casement Features + Options

Easy Wash Mode

Ultimate Casement windows allow access to both sides of the glass from inside your home, making it easy to wash them without ladders or stress.

Marvin-exclusive Wash Mode not available on Ultimate Casement windows in sizes less than 20" wide or Ultimate French Casement, Ultimate Awning, or Round Top windows.

Divided Lite Options

A variety of divided lite patterns further personalize your home and can even be used to make a casement look like a double hung. Perfect for replacing windows in older, more traditional homes.

Multi-Point Locking System

Multi-point locking mechanisms enhance performance and make large casements easy to operate.

Lock Status Sensor

Hidden Lock Status Sensor option connects with your Smart Home Security to indicate when windows are closed and locked.

Large Sizes Open With Ease

We have developed the most durable hardware in the industry, which provides easy opening and smooth operation on even the largest casements.

Window Opening Control Device

Limits the casement sash opening to less than 4" when engaged. The release mechanism allows for operation beyond 4". This option meets the ASTM F2090-21 standard.

Friction Limiter

Flip a lever to lock the sash securely in place at multiple set angles, allowing you to keep your windows open on windy days. Available for push-out only.

Casement

The Marvin Ultimate™ Casement window is offered in some of the largest sizes in the Marvin portfolio, with a secure multi-point lock, durable hardware that ensures smooth operation, and the exclusive Wash Mode for easy cleaning –even on upper floors. With many design options, including round top shapes, the Ultimate Casement window flexes to fit your vision and can be sized to complement the most expansive views.

Bay

Marvin Ultimate™ Bay windows are a group of connected windows extending outward from a room at desired angles – allowing light and views from multiple directions. Some feature a larger operating or stationary window flanked by smaller windows. Ultimate Bay windows can create space indoors for a cozy nook or window seat or maximize a scenic view to serve as a room's focal point. They can be created with combinations of three to six casement or double hung windows (fixed or operating).

Bow

Marvin Ultimate™ Bow windows are a series of windows connected to form a gentle outward curve. Typically made up of four or more windows, Ultimate Bow windows can create a small nook, open up a view, bring in more light, and boost visual appeal from inside and out. They can be created with combinations of three to six casement or double hung windows (fixed or operating).

Door Terms + Definitions

1

Frame

The door frame includes the head jamb across the top, side jambs, and the sill at the bottom. Marvin® frames are built strong to stand up to heavy door usage year after year.

2

Stiles + Rails

The horizontal wood members of a door are called rails; the vertical components are called stiles. With a traditional French door design, the bottom rail is about 8" high with 4-¾" stiles and top rail. Doors with a more contemporary style often feature more glass with stiles and rails as sleek as 3".

3

Panels

In a door, the panel is the main section, operating or stationary, that is installed into the frame. Marvin doors come in many sizes, some of the industry's largest, but they all share the tight tolerances for fit and quality finishes.

4

Sill

Our door sills are made of Ultrex®, our proprietary pultruded fiberglass that is exceptionally strong and virtually impervious to time, weather, and pressure. Ultrex fiberglass door sills provide excellent performance in hot or cold climates, plus durability over the long haul by being resistant to warping, denting, and fading.

Door Operating Styles

Outswing

Single or double swinging doors open to the exterior.

Inswing

Single or double swinging doors open to the interior.

Sliding

Save space with a door panel that operates by sliding along a track.

Bi-Fold

This door folds open and closed like an accordion and can include up to 16 panels.

Lift and Slide

For openings as large as 48' wide and 12' high, large door panels fully open into pocket or stacked configurations.

Multi-Slide

Another option to blend interior and outdoor living with a modular frame system.

Door Features + Options

Beauty with Performance

Designed for durability and to minimize air and water infiltration. Many of our door products are certified to a light commercial rating of PG40.

Multi-Point Locking System

Concealed stainless steel head and foot bolts within the door secure it solidly at three points. Choose either a keyed or non-keyed lever handle. Multi-point lock comes standard.

Sills

Our Performance and Accessibility sills are made of durable Ultrex® fiberglass and provide solutions for varying applications.

Solid Wood Panels + Frames

The sound of a Marvin® door closing is a quiet statement of quality. Wood in the panels and frames makes for an elegant, crafted look and feel, and provides a weathertight closure for outstanding energy efficiency.

Adjustable Hinge

Standard on swinging doors, an adjustable hinge makes it easy to fine-tune the fit of a swinging door over the door's lifetime. Available in a variety of finishes, plus coastal options.

Raised and Flat Panels

Raised and flat panels add depth and style to sliding and swinging French doors, including archtop swinging doors. This option changes the overall aesthetic of your door when less than a full lite of glass is desired.

Swinging French G2

The Marvin Ultimate™ Swinging French door G2, available in both inswing and outswing, delivers a traditional aesthetic with a 4-¾" stile and top rail and a 4-¾" or 8-⅛" bottom rail. Select sizes up to 14' wide and 10' high to maximize views and access to the outdoors. Choose up to four panels with an Ogee interior glazing profile.

FEATURES

- Select up to four panels, one or two operating panels, and unequal panel widths
- A traditional aesthetic, with 4-¾" stile and top rail, an 8-⅛" bottom rail and optional 4-¾" bottom rail
- Inswing or outswing motion meets design and weather constraints
- Available up to 14' wide and 10' high
- Ogee interior with simulated putty exterior glazing profiles. Optional square interior with simulated putty exterior glazing profiles.
- Adjustable hinges for easy installation and years of smooth operation

Swinging Narrow Profile

The Marvin Ultimate™ Swinging Narrow Profile door, available in both inswing and outswing, is expertly crafted to provide industry-leading performance with narrow sightlines and robust 2-¼" standard panel thickness. Featuring contemporary 3" stiles and rails along with square interior and exterior glazing profiles. Choose from one or two operating panels in configurations up to four panels. Sizes up to 10' high and 14' wide.

- Square interior and exterior glazing profiles. Optional Ogee interior with simulated putty exterior glazing profiles.
- Adjustable hinges for easy installation and years of smooth operation

Sliding French G2

For the classic elegance of the French door with smooth, space-saving operation, the Marvin Ultimate™ Sliding French door G2 is built to your specifications. With a rich, luxurious fit, feel, and finish, available in configurations up to 16' wide and standard heights up to 10', this door offers a grand entrance while conserving space for traffic flow or furniture. Available transom and stationary panels further enhance the view, flooding the room with daylight.

- Available up to 20' wide and 10' high
- Ogee interior with simulated putty exterior glazing profiles. Optional square interior with simulated putty exterior glazing profiles.
- Robust stainless steel rollers and superior engineering for nearly effortless operation

Sliding Narrow Profile

Marvin Ultimate™ Sliding Narrow Profile doors are created for smooth operation, performance, and amazing durability. Our tough Performance sill withstands traffic and seasonal changes, contributing to both the door's energy efficiency and incredibly smooth operation. The contemporary 3" stiles and rails maximize your view, while the multi-point lock system ensures a tight seal and security from top to bottom.

FEATURES

- Narrow 4-3/4" top and bottom rail makes large glass panels the focal point
- Available with Impact Zone 3 (IZ3) coastal/hurricane certification
- Fits openings up to 60' wide by 12' high
- Individual panel sizes available up to 6' wide by 11'6" high
- Choose panels that move in one direction or that meet at the center or a corner or panels that stack in full view within the frame or conceal within a wall pocket
- 22 operating configurations are available
- Three panel center-stacked configuration also available with an immovable center panel and operating panels on each side

Bi-Fold

The Marvin Ultimate™ Bi-Fold door provides big glass and clean design aesthetics to give homeowners more flexibility and a deep indoor-outdoor connection. Spanning 55' in width, the Ultimate Bi-Fold door is one of the widest panel doors in the industry. Without question, the Bi-Fold door is a simple, elegant solution for adjoining interior spaces or connecting to the outdoors. Available with a wood or clad exterior.

- Fits openings up to 55' wide by 10' high
- Individual panel sizes available up to 3'6" wide by 9'6" high
- Available with a wood interior and exterior, making it a great solution for dividing interior spaces
- Choose from 81 operating configurations

Lift and Slide

With openings up to 48' wide and 12' high, Marvin Ultimate™ Lift and Slide doors let you add acres to your floor plan. Available with pocketing panels that slide into the wall, completely disappearing from view, or stacked panels that slide and stack perfectly within the door frame for a seamless transition from inside to out. Both are available with exclusive flush-mount handles and exterior finger pulls that virtually disappear when not in use.

Interior Finish Options

Wood Species

Offering a rich, warm look, many custom options, and design versatility, wood is a premium choice. Wood can be used on both the interior and exterior of Marvin Ultimate™ windows and doors and provides great insulation. Treatments such as stain and paint work well when applied. Marvin sources the best, highest-quality raw wood and uses refined techniques to process it.

Exterior Casings + Subsills

Adding Marvin® extruded aluminum or wood casings and subsills to your windows and doors provides great architectural detail to any home. Ultra-durable extruded aluminum casings feature a beautiful factory-applied finish that resists chalking, fading, pitting, corrosion, and marring. Casing profiles are consistent around the sides and top of a window or door, except for the Potter casing profile, which has a taller head. Custom casings and subsills are also available.

Divided Lites

Marvin® offers divided lites in a number of different styles to create the traditional look of individual panes of glass with the energy efficiency of dual-pane insulation.

Our custom capabilities allow us to create almost any divided lite pattern to match your design style.*

Simulated Divided Lite (SDL)

SDL bars are permanently adhered to both sides of the glass. Simulated Divided Lites with Spacer Bars (SDLs) are an energy-efficient way to create the look of authentic divided lites.

Authentic Divided Lite (ADL)

Separate panes of glass are glazed between muntin bars for historical accuracy. Available exclusively with wood exterior units.

Grilles-Between-the-Glass (GBG)

Grilles are permanently installed between the glass panes. This low-maintenance grille offers the look of a divided lite pattern with the ease of cleaning just one pane of glass. Available with different interior and exterior colors.

Glass + Glazing

The thermal and structural properties of wood combined with the right glazing make Marvin® wood and extruded aluminum-clad products an optimal choice for energy efficiency. We offer thousands of window and door options with two or three panes of glass and a range of glazing options to meet the performance challenges of any climate.

Dual-Pane Glazing

Our standard glazing is dual pane: two panes of glass with Low E coatings and insulated with argon gas. Compared with a single glass pane, dual-pane glass cuts energy costs significantly because of low-emissivity coating and the gas-filled insulating space between the glass layers.

Triple-Pane Glazing

Triple-pane glazing consists of three panes of glass with Low E coating applied to the surface. Two glass spaces are insulated with argon gas between the panes. Available in products where glazing thickness can be greater than ¾".

Glass Coatings

Low E coatings are microscopically thin, essentially invisible coatings on the glass surface that help manage the amount of light and heat conducted through a window pane or reflected away from it, reducing a home's dependence on heat and air conditioning. The national ENERGY STAR® program recognizes products that meet strict energy-efficiency guidelines to suit climates in different areas of the country, and Marvin offers products to meet climate and code requirements in every region.

Low E1

Low E1 coating is a good choice when you want maximum solar heat gain and radiant heating properties. This type of coating is generally used in Northern climates where heating is prioritized over cooling. You'll reap maximum benefits when windows with this type of coating are positioned to receive direct sun exposure.

Low E2

The most common Low E coating, since it works well across most geographic regions and climates. Low E2 with two metallic coatings balances less solar heat gain and improved radiant heating properties.

Low E3

Used in applications where solar heat gain may be a concern, Low E3 coating uses multiple metallic layers for radiant properties similar to Low E2. This type of coating is most commonly used in Southern, sunny climates where cooling is prioritized over heating.

Glazing Profiles

Ogee and square interior and exterior glazing profiles are available. Choose Ogee for more traditional projects, and square for a clean, contemporary look. Interior and exterior glazing profile options vary by product type.

Specialty Glass

Our specialty options include glass for unique project needs like sound abatement (STC/OITC), high altitudes, Sea Turtle Conservation Codes, and California fire zones. We also offer laminated glass on certain products that are designed specifically for hurricane zones.

A variety of decorative glass options, including those shown below and others, are available to meet the unique needs of each project. Laminated glass is also available in clear, bronze, gray, or green with tinted interlayers.

Black Aluminum Aire

Bright Aluminum Wire

Bright Bronze Wire

Charcoal Fiberglass

DOUBLE HUNG SCREENS

Full or Half Screen

Exterior aluminum screen with an aluminum surround. The full screen covers both the top and bottom sash. The half screen only covers the bottom sash.

CASEMENT SCREENS

Wood Screen Surround

The patented wood screen surround with wood interior and aluminum exterior features Marvin BrightView screen mesh. Aluminum screen mesh options also available.

Inswing Casement Screen

The patented wood screen surround with wood interior and aluminum exterior features Marvin BrightView screen mesh. Aluminum screen mesh options also available.

DOOR SCREENS

Scenic Door Sliding Screen

The Marvin Ultimate™ Sliding Screen operates with ease and conceals when not in use. The screen is unobtrusive even in large sizes measuring up to 15' wide and up to 10' high uni-directional or up to 29'6" wide bi-parting.

Swinging Screen Door

With profiles that complement the aesthetics of the door, swinging door screens feature robust, durable extruded aluminum surrounds and concealed hinges.

Sliding Screen Door

Aluminum top hung sliding screen with roller bar, adjustable rollers, and unmatched sliding operation.

DOUBLE HUNG STORM OPTIONS

Two-Lite Wood Storm Sash/Screen

A wood frame containing non-removable glass. The storm sash can be removed during the summer and replaced with a wood-framed screen. Available only on wood windows.

Storm and Screen Combinations

A combination unit is composed of two glass panels and one screen panel that can be easily removed from the interior for cleaning. Available with a wood (bare or primed) or aluminum surround, panels can be configured multiple ways: glass above screen, screen above glass, or glass above glass.

Energy Panel

Often confused with storm windows, an energy panel is technically a glazing option. It is a removable, exterior glass panel finished on the edges by a surround. Energy panels cover the exposed glass surface of each sash and offer added energy efficiency for wood windows with single glazing.

Window Hardware

The Marvin Ultimate™ collection’s durable and elegant hardware is engineered for reliability and to harmonize with any décor.* Choose a finish to complement your architectural style. Durable painted finishes in Matte Black, Satin Taupe, Bronze, and White mimic the look of metal. Satin Nickel, Brass, Antique Brass, Polished Chrome, Oil Rubbed Bronze, and Satin Chrome offer the rich appearance and durability of authentic metal finishes.

Home Automation

Lock Status Sensor

Our Lock Status Sensor brings smart home capabilities to Marvin® windows and doors. This affordable solution is installed in the factory and fully concealed—meaning no unsightly sensors attached on the exterior or interior and no additional modification of your product once installed. The sensor can be wired or wirelessly connected, working in tandem with your smart home security system to indicate if windows and doors are closed and locked and providing peace of mind when security is a concern.

Window Safety

Window Opening Control Devices

Marvin Window Opening Control Devices (WOCD) meet the ASTM F2090-21 standard, created to assist in the prevention of window falls. To meet the standard, our devices limit the window's net clear opening to less than 4" (when the sash is open) and have a release function allowing the window to open completely. In order to meet the safety standard, WOCD disengagement takes two independent actions, which helps prevent accidental release. Devices will then automatically reengage once the window is closed and again limit the window opening to less than 4" upon re-opening.

ULTIMATE CASEMENT

ULTIMATE DOUBLE HUNG G2

ULTIMATE GLIDER

Coastal Windows + Doors

MARVIN ULTIMATE™ DOUBLE HUNG G2,
ROUND TOP WINDOWS
Stone White

Coastal Impact Products

Coastal living is beautiful and serene until the storms hit. Marvin® Impact Zone 3 (IZ3) products are certified for energy efficiency and rigorously tested by third-party agencies to meet or exceed the most stringent coastal codes. Impact products are designed to protect against flying debris, driving rain, cyclic pressure, temperature extremes, and more.

Double Hung G2

Blends traditional beauty with state-of-the-art window performance. Also available in an operating Round Top.

Casement + Awning

Revolutionary hardware system allows you to wash the outside of your windows from the inside with ease.

Wood Double Hung

Incredibly durable, versatile, and easy to use. An all-wood exterior and interior bring beautiful and classic style to your project. Also available in Round Top.

Picture, Direct Glaze + Transom

Picture and Direct Glaze windows are available in a wide range of polygon and radius shapes. Transoms are stationary in-sash glazed windows.

Mull Options

Dramatic ocean views are often created by grouping IZ3 windows in an assembly, sometimes joining them both horizontally and vertically. The space between the windows where they are joined together is called a mull.

Mulling options for Marvin IZ3 Ultimate™ Casement windows and with frame-to-frame mulling configurations are WDMA certified in most sizes.

Bi-Fold Door

Creates a wide-open transition to outdoor spaces. The Bi-Fold door offers more glass and a clean aesthetic.

Multi-Slide Door

Blends exceptional views and indoor/outdoor living with performance. Available in styles up to six panels uni-directional and 10 panels bi-parting.

Sliding French Door G2

The elegant look of a traditional French door with a space-saving sliding design.

Sliding Narrow Profile Door

Features 3" stiles and rails for a more contemporary look.

Swinging French Door G2

Combines a traditional French style with expert craftsmanship, engineered for both quality and performance. Select from inswing or outswing operation.

Swinging Narrow Profile Door

The narrow 3" stiles and rails increase the glass opening and help provide larger views. Choose between inswing or outswing operation and configurations of up to four panels.
