

MARVIN
VIVID™
COLLECTION

MARVIN® 

BOLDLY INNOVATIVE

CATALOG

Five Collections. One Legacy of Innovation.

Realize your unique vision, down to the last detail, with Marvin.

Born out of a legacy of innovation, the Marvin portfolio sets the highest standards in quality you can see and feel. Each premium collection blends inspired design and materials that perform.

Through expertly crafted architectural detailing, industry-leading engineering, and true partnership, Marvin helps open up a world of possibilities.

MARVIN ULTIMATE™ COLLECTION

Endless Possibilities

Realize unique visions with endless design possibilities, each meticulously crafted.

INTERIORS

MARVIN
VIVID™
COLLECTION

Bold Design. Bolder Sizes.

When dramatic sizes, durability, performance, and energy efficiency are your top priorities, go boldly with the Marvin Vivid collection. Vivid products feature low-maintenance beauty, thanks to our innovative, proprietary Ultrex® fiberglass. A wide range of sizes and configurations—and a refined fit and finish—make Vivid an inspired choice for transitional to contemporary projects.

Why Materials Matter

Proprietary Ultrex Fiberglass

Innovative Ultrex® fiberglass was pioneered by Marvin as one of the first premium composites on the market.

Ultrex fiberglass features high-density woven fibers bound by a thermally set resin, making it much more resistant to pressure and temperature shifts than wood-vinyl composites.

Fiberglass Reinforced Composite

Used exclusively on Vivid™ window interiors, a proprietary fiberglass reinforced composite features a premium acrylic-based finish for low-maintenance beauty that lasts.

EXTERIOR

Proprietary Ultrex Fiberglass

INTERIOR

Fiberglass Reinforced Composite

Strength

The strength of Ultrex fiberglass translates into long life expectancy of operation, minimal maintenance, and superior performance.

Stability

By expanding and contracting at nearly the same rate as glass, Marvin windows and doors made with Ultrex fiberglass are more resistant to leaks and seal failures.

Finish

The proprietary acrylic finish is 3x thicker than other five painted options, and resistant to chipping, peeling, or fading.

Energy Efficiency

Ultrex fiberglass combined with energy-efficient glass options can help manage the amount of light and heat entering and leaving your home.

How It's Made

Ultrex fiberglass is a composite material made of fine glass fibers woven into a cloth then bonded together with a formulated polyester resin. The continuous strands of fiberglass give Ultrex its strength in resisting breakage.

1

Raw Fiberglass Strands

Thin strands of strong glass cables are saturated with specifically compounded resins.

2

Pultruded Fiberglass

The strands are pulled through a heated die and cut with diamond-edged blades to form Ultrex fiberglass.

3

Proprietary Acrylic Finish

A proprietary acrylic finish is then applied; it's smoother and 3x thicker than other brands.

Stability You Can Count On

Constant expansion and contraction can gradually break down windows and doors, causing leaky seals, poor operation, and loss of structural integrity.

Ultrex® fiberglass expands and contracts at virtually the same rate as glass, so Marvin Vivid™ windows and doors stay tight and true over time, resisting air leaks, seal failures, and stress cracks that can compromise energy efficiency and long-term performance.

This low rate of expansion and contraction also allows windows and doors to open and close on demand without sticking or binding from swelling, warping, material distortion, or deformation from the heat.

A Long-Term Finish

Marvin Ultrex fiberglass finish is verified to the American Architectural Manufacturers Association (AAMA) 624 specification. Achieving AAMA 624 verification means that our finish has passed rigorous tests that simulate the harsh conditions encountered throughout the life of a window or door.

Ultrex fiberglass uses an acrylic finish that is paintable, fade resistant, and virtually maintenance free. With a finish that's 3x thicker than competitive painted options, it resists chipping, denting, and peeling.

ULTREX FIBERGLASS HAS

75%

less expansion than Fibrex®

87%

less expansion than vinyl

IN EXTREME WEATHER CONDITIONS

stays true

Vinyl
can expand

Lasting Performance

Proprietary Ultrex fiberglass finish resists scratches, chalking, and fading—even in dark colors

Exteriors can be painted to match any home

Virtually maintenance free—no sanding, scraping, or painting care needed

Finish is 3x thicker than competitive painted options

Design Efficiency Pros in Mind

The low thermal conductivity and superior performance of Ultrex fiberglass combine with a selection of energy-efficient glazing (glass) options that help manage the amount of light and heat entering and leaving your home. Our unique Ultrex® fiberglass material, available factory services, and network of dedicated service and support personnel make the Marvin Vivid **Top Rated Efficiency** choice – no matter the project.

Windows and doors with low conductivity reduce heat loss in homes, which translates to lower energy bills.* Ultrex fiberglass provides an insulated barrier against extreme weather temperatures, keeping homes comfortable and reducing heating and cooling costs.

Windows

Choose from Casement, Awning, Direct Glaze, and Specialty Shape windows to complement your project's architectural style.

Glass Options

Simulated divided lite with standard double pane or optional triple pane is available on select Marvin Vivid products. Available with hung, low E, low E2, low E3/ERS, low E4, and Low E3/ERS deminsulated glass with argon gas.† Options include glazing the horizontal sash with (STC/OITG), high lite, and cut glass above and below.

These illustrations offer a sampling of 7/8" SDL patterns that can be selected in combination with the 2" simulated checkrail on Casement, Awning, Direct Glaze rectangle, and Picture windows.*

SIMULATED CHECKRAIL OPTIONS

Accessibility Options

Opening Control Device

Limits opening to 4" while providing for full egress. ASTM F2090 compliant.

The look of multiple individual panes of glass is popular in a wide range of architectural styles.

Sash Limiter

Simulated Divided Lites (SDLs) and Grilles-Between-the-Glass (GBGs) mimic the look of these individual panes of glass without sacrificing energy efficiency.

Divided lites available on select Vivid products.

Grilles-Between-the-Glass

GBGs are available in several popular lite cut options for a classic divided lite look and easy glass cleaning.† Available in Ebony and Stone White interior and Ebony, Bronze, Pebble Gray, and Stone White exterior.

Simulated Divided Lite

These bars permanently adhere to both sides of the glass for a more authentic look. Available with spacer bar and in several lite cut options.†

ACCESSIBILITY OPTIONS

* Not available on direct glaze specialty shape windows

† Argon gas not available in high elevations where capillary tubes are required
† For more options, visit marvin.com

Since 1912, Marvin has been a family-owned and -led company, with a legacy of innovation and commitment to the highest quality. We understand the unique opportunity windows and doors have to improve our spaces and how we feel in them. That's why we never stop pushing what's possible and inventing new solutions to channel fresh air, enhance light quality, and connect with the world around us.
